Since 2000, Genome BC has led genomics innovation on Canada’s West Coast and facilitated the integration of genomics into society. We manage a cumulative portfolio of $1.27 billion* in more than 498 research projects, technology platforms and innovation initiatives.

We thank our funding partners including the Province of British Columbia, the Government of Canada through Genome Canada and Pacific Economic Development Canada, and project co-funders.

**PROJECTS AND FUNDING**

**HEALTH**
- 265 PROJECTS
- $576 MILLION
